The synonyms of “Atomic” are: nuclear

Atomic as an Adjective

Definitions of "Atomic" as an adjective

According to the [Oxford Dictionary of English](#), “atomic” as an adjective can have the following definitions:

- *Of or relating to or comprising atoms.*
- *Of or forming a single irreducible unit or component in a larger system.*
- *(of a substance) consisting of uncombined atoms rather than molecules.*
- *Deriving destructive energy from the release of atomic energy.*
- *Relating to an atom or atoms.*
- *Relating to or using the energy released in nuclear fission or fusion.*
- *Immeasurably small.*
- *(weapons) deriving destructive energy from the release of atomic energy.*

Synonyms of "Atomic" as an adjective (1 Word)

nuclear Denoting possessing or involving weapons using nuclear energy.
***Nuclear** membrane.*

Usage Examples of "Atomic" as an adjective

- *Atomic hydrogen.*
- *The atomic nucleus.*
- *A society made up of atomic individuals pursuing private interests.*
- *Atomic weapons.*
- *The atomic age required a new way of political thinking.*
- *The nature of matter at the atomic level.*
- *Atomic bombs.*

Associations of "Atomic" (30 Words)

<u>annihilation</u>	The conversion of matter into energy, especially the mutual conversion of a particle and an antiparticle into electromagnetic radiation. <i>The threat of global annihilation.</i>
<u>atom</u>	Atomic particles as a source of nuclear energy. <i>The power of the atom.</i>
bomb	Attack a place or object with a bomb or bombs. <i>A 100 lb van bomb.</i>
cesium	A soft silver-white ductile metallic element (liquid at normal temperatures); the most electropositive and alkaline metal.
detonate	Cause to burst with a violent release of energy. <i>Two other bombs failed to detonate.</i>
detonation	A violent release of energy caused by a chemical or nuclear reaction. <i>She was in a control building at the time of detonation.</i>

diatomic	Of or relating to a molecule made up of two atoms. <i>Only diatomic molecules are easy to study in this way as larger molecules invariably fragment.</i>
dissociate	Regard as unconnected. <i>Acids dissociate to give hydrogen ions.</i>
dynamics	The branch of mechanics concerned with the forces that cause motions of bodies. <i>The dynamics of changing social relations.</i>
electrolyte	The ionized or ionizable constituents of a living cell, blood, or other organic matter. <i>The proper amount and distribution of electrolytes in the body is essential for health.</i>
electron	An elementary particle with negative charge.
explosive	Likely to cause an outburst of anger or controversy. <i>An explosive issue.</i>
fusion	Referring to food or cooking which incorporates elements of both Eastern and Western cuisine. <i>The fusion of resin and glass fibre in the moulding process.</i>
implode	Burst inward. <i>He lost money when the market imploded.</i>
ion	A particle that is electrically charged (positive or negative); an atom or molecule or group that has lost or gained one or more electrons. <i>Hydrogen ions.</i>
lithium	Lithium carbonate or another lithium salt used as a mood stabilizing drug.
molecular	Relating to simple or elementary organization-G.A. Miller. <i>Molecular oxygen.</i>
molecule	(physics and chemistry) the simplest structural unit of an element or compound.
neutron	An elementary particle with 0 charge and mass about equal to a proton; enters into the structure of the atomic nucleus.
nuclear	Denoting possessing or involving weapons using nuclear energy. <i>Nuclear war.</i>
nucleate	Form into a nucleus. <i>Small villages nucleate into larger towns and eventually become cities.</i>
nucleus	A discrete mass of grey matter in the central nervous system. <i>The nucleus of a British film producing industry.</i>

ordnance	Military supplies. <i>The ordnance corps.</i>
particle	Any of numerous subatomic constituents of the physical world that interact with each other including electrons neutrinos photons and alpha particles. <i>He agrees without hearing the least particle of evidence.</i>
polymer	A substance which has a molecular structure built up chiefly or completely from a large number of similar units bonded together, e.g. many synthetic organic materials used as plastics and resins.
proton	A stable particle with positive charge equal to the negative charge of an electron.
protoplasm	The substance of a living cell (including cytoplasm and nucleus.
reactor	Any of several kinds of apparatus that maintain and control a nuclear reaction for the production of energy or artificial elements.
thermonuclear	Relating to or involving weapons in which explosive force is produced by thermonuclear reactions. <i>Thermonuclear war.</i>
tiny	A very young child. <i>Tiny feet.</i>
