- *A technique for repairing a tooth; resinous material is applied to the surface of the tooth where it adheres to the tooth's enamel.*
- *Fastening firmly together.*
- *A close personal relationship that forms between people (as between husband and wife or parent and child.*
- *The placement of dutiable goods in bond.*
- *The laying of bricks in an overlapping pattern so as to form a strong structure.*
- *The action of joining things securely by means of adhesive, heat, or pressure or by chemical bonds.*

Synonyms of "Bonding" as a noun (1 Word)

soldering Fastening firmly together.

Usage Examples of "Bonding" as a noun

- *The bonding of metals to non-metals.*
- *Scientific principles such as chemical bonding or the workings of jet propulsion.*
- *The bonding of the brickwork would have to be altered during construction to allow a window to be inserted.*
- *We were friendly to each other, but there was no bonding.*
- *The interactions are stabilized by hydrogen bonding.*
- *They want the introduction of bonding to guarantee that consignments will be properly handled.*
- *Family bonding can be accomplished by planning a fishing trip.*

Associations of "Bonding" (30 Words)

<u>alchemy</u>	The way two individuals relate to each other. <i>Finding the person who s right for you requires a very subtle alchemy.</i>
<u>alkaline</u>	Having the properties of an alkali, or containing alkali; having a pH greater than 7. <i>An alkaline soil.</i>
<u>alloy</u>	Make an alloy of. <i>Alloy wheels.</i>
anode	The negatively charged terminal of a voltaic cell or storage battery that supplies current.
<u>atom</u>	Atomic particles as a source of nuclear energy. <i>Eight atom hockey teams.</i>
braze	A brazed joint. <i>A disc is brazed to the cut off end of the drill shank.</i>
cathode	The positively charged terminal of a voltaic cell or storage battery that supplies current.

<u>chemical</u>	Relating to or denoting the use of poison gas or other chemicals as weapons of war. <i>Chemical engineer.</i>
chemically	In a way that relates to chemistry, or to the interactions of substances as studied in chemistry. <i>Her naturally wavy blonde hair was chemically straightened.</i>
<u>chemistry</u>	The complex emotional or psychological interaction between people. <i>The chemistry of soil.</i>
<u>compound</u>	Composed of more than one partcompound flower heads. <i>A compound of hydrogen and oxygen.</i>
copper	Coat with a layer of copper. <i>Some iron hulls were sheathed with wood and then coppered.</i>
electricity	A form of energy resulting from the existence of charged particles (such as electrons or protons), either statically as an accumulation of charge or dynamically as a current. <i>The regional electricity companies.</i>
electrode	A conductor used to make electrical contact with some part of a circuit.
electron	A stable subatomic particle with a charge of negative electricity, found in all atoms and acting as the primary carrier of electricity in solids.
hydrogen	A nonmetallic univalent element that is normally a colorless and odorless highly flammable diatomic gas; the simplest and lightest and most abundant element in the universe.
hydroxide	A compound of a metal with the hydroxide ion OH as in many alkalis or the group OH.
ion	An atom or molecule with a net electric charge due to the loss or gain of one or more electrons. <i>A sulphate ion.</i>
isotope	One of two or more atoms with the same atomic number but with different numbers of neutrons. <i>Some elements have only one stable isotope.</i>
lithium	Lithium carbonate or another lithium salt used as a mood stabilizing drug.
magnetize	Give magnetic properties to; make magnetic. <i>A compass is really a magnetized needle.</i>
manganese	The black dioxide of manganese as an industrial raw material or additive especially in glass making.
<u>metal</u>	Cover with metal. <i>Industrial music is a blend of metal and techno.</i>

molecule	A tiny piece of anything.
monoxide	An oxide containing one atom of oxygen in its molecule or empirical formula.
neutrino	A neutral subatomic particle with a mass close to zero and half integral spin which rarely reacts with normal matter Three kinds of neutrinos are known associated with the electron muon and tau particle.
neutron	A subatomic particle of about the same mass as a proton but without an electric charge, present in all atomic nuclei except those of ordinary hydrogen.
physics	The branch of science concerned with the nature and properties of matter and energy The subject matter of physics includes mechanics heat light and other radiation sound electricity magnetism and the structure of atoms. <i>He studied the physics of radiation.</i>
silicate	A salt or ester derived from silicic acid.
welding	Fastening two pieces of metal together by softening with heat and applying pressure.
