- *If not for his shrewd engineering, the election would have been lost.*
- *He had trouble deciding which branch of engineering to study.*

Associations of "Engineering" (30 Words)

advanced

Ahead of the times.
People of **advanced** years.

aeronautic

Of or pertaining to aeronautics.

aeronautics

The science or practice of building or flying aircraft.

aerospace

The atmosphere and outer space considered as a whole.

automatic

A vehicle with automatic transmission.
An **automatic** kettle that switches itself off when it boils.

biomedical

Relating to the activities and applications of science to clinical medicine.

bionics

Application of biological principles to the study and design of engineering systems (especially electronic systems).

biotech	<p>The branch of molecular biology that studies the use of microorganisms to perform specific industrial processes.</p> <p>Biotechnology produced genetically altered bacteria that solved the problem.</p>
biotechnology	<p>The exploitation of biological processes for industrial and other purposes, especially the genetic manipulation of microorganisms for the production of antibiotics, hormones, etc.</p> <p>Biotechnology produced genetically altered bacteria that solved the problem.</p>
commercialization	<p>The process of managing or running something principally for financial gain.</p> <p>The escalating commercialization of athletics.</p>
computer	An expert at calculation (or at operating calculating machines.
device	<p>Something in an artistic work designed to achieve a particular effect.</p> <p>Their shields bear the device of the Blazing Sun.</p>
electrical	<p>Shares in companies manufacturing electrical goods.</p> <p>Electrical appliances.</p>
electronic	<p>Of or relating to electronics concerned with or using devices that operate on principles governing the behavior of electrons.</p> <p>Electronic banking.</p>
electronics	<p>The branch of physics and technology concerned with the design of circuits using transistors and microchips, and with the behaviour and movement of electrons in a semiconductor, conductor, vacuum, or gas.</p> <p>Electronics is seen as a growth industry.</p>
industrial	<p>Shares in industrial companies.</p> <p>Industrial work.</p>
industry	<p>A particular form or branch of economic or commercial activity.</p> <p>The Shakespeare industry.</p>
machinery	<p>The components of a machine.</p> <p>Farm machinery.</p>
manufacturing	<p>The making of articles on a large scale using machinery; industrial production.</p> <p>Manufacturing is vital to Great Britain.</p>
mechanical	<p>(of an action) done without thought or spontaneity; automatic.</p> <p>Mechanical arts.</p>
metallurgical	<p>Of or relating to metallurgy.</p> <p>Metallurgical engineer.</p>

meteorology	The climate and weather of a region. <i>Overwintering would allow the team to investigate the island's meteorology.</i>
microprocessor	Integrated circuit semiconductor chip that performs the bulk of the processing and controls the parts of a system. <i>A disk drive contains a microprocessor to handle the internal functions of the drive.</i>
newfangled	Gratuitously new. <i>Newfangled ideas.</i>
optics	The scientific study of sight and the behaviour of light, or the properties of transmission and deflection of other forms of radiation. <i>The optics of a telescope.</i>
robotic	Resembling or characteristic of a robot, especially in being stiff or unemotional. <i>The lander has a robotic arm that will dig into the Martian surface to collect samples for analysis.</i>
science	A particular area of science. <i>The sweet science of pugilism.</i>
semiconductor	A solid substance that has a conductivity between that of an insulator and that of most metals either due to the addition of an impurity or because of temperature effects. Devices made of semiconductors notably silicon are essential components of most electronic circuits.
technology	The practical application of science to commerce or industry. <i>Advances in computer technology.</i>
wireless	Using radio, microwaves, etc. (as opposed to wires or cables) to transmit signals. <i>Listening to the news on the wireless.</i>
