Gender as a Noun

Definitions of "Gender" as a noun

According to the [Oxford Dictionary of English](#), “gender” as a noun can have the following definitions:

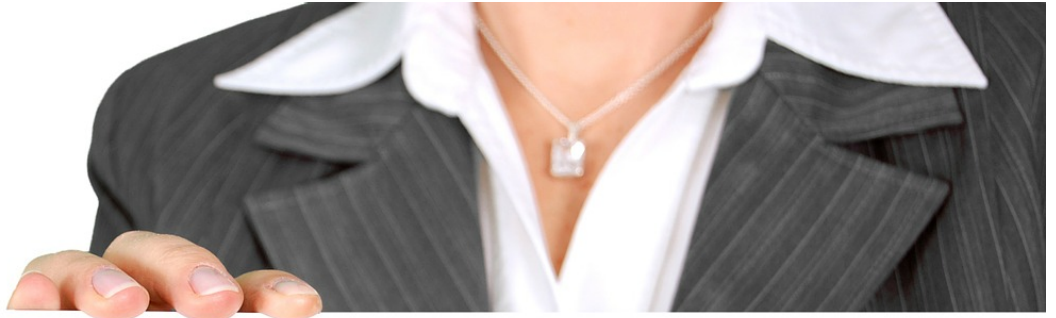

- *Members of a particular gender considered as a group.*
- *Either of the two sexes (male and female), especially when considered with reference to social and cultural differences rather than biological ones. The term is also used more broadly to denote a range of identities that do not correspond to established ideas of male and female.*
- *The properties that distinguish organisms on the basis of their reproductive roles.*
- *The property (in nouns and related words) of belonging to a grammatical gender.*
- *The fact or condition of belonging to or identifying with a particular gender.*
- *A grammatical category in inflected languages governing the agreement between nouns and pronouns and adjectives; in some languages it is quite arbitrary but in Indo-European languages it is usually based on sex or animateness.*
- *(in languages such as Latin, French, and German) each of the classes (typically masculine, feminine, common, neuter) of nouns and pronouns distinguished by the different inflections which they have and which they require in words syntactically associated with them. Grammatical gender is only very loosely associated with natural distinctions of sex.*
