Usage Examples of "Magnitude" as a noun

- *Events of tragic magnitude.*
- *They may feel discouraged at the magnitude of the task before them.*
- *They tried to predict the magnitude of the explosion.*

- *Electorates of less than average magnitude.*
- *The brightest stars have the lowest magnitudes.*
- *A star of the fifth magnitude.*
- *A problem of the first magnitude.*
- *A range of a tenth of a magnitude.*
- *About the magnitude of a small pea.*
- *The magnitudes of all the economic variables could be determined.*

Associations of "Magnitude" (30 Words)

ammeter	An instrument for measuring electric current in amperes.
amount	Be tantamount or equivalent to. *An adequate **amount** of food for four people.*
anemometer	A gauge for recording the speed and direction of wind.
benchmark	Give particular results during a benchmark test. *The device should **benchmark** at between 100 and 150 MHz.*

calorimeter	A measuring instrument that determines quantities of heat.
count	Take account of. *The party s only candidate was eliminated at the first **count**.*
dimension	Shape or form to required dimensions. *The seats and backrests are **dimension**ed to withstand high loads from items such as unsecured luggage.*
estimate	Judge tentatively or form an estimate of quantities or time. *His high **estimate** of the poem.*
extent	The particular degree to which something is or is believed to be the case. *Everyone will have to compromise to some **extent**.*
fathom	(mining) a unit of volume (equal to 6 cubic feet) used in measuring bodies of ore. *The locals could not **fathom** out the reason behind his new found prosperity.*
gauge	Measure the dimensions of an object with a gauge. *500 **gauge** polythene.*
measure	Express as a number or measure or quantity. *She helped to **measure** out the ingredients.*
metric	The metric system. *The external structure of space time is described by the Schwarzschild **metric**.*
micrometer	A metric unit of length equal to one millionth of a meter.
photometer	An instrument for measuring the intensity of light.
photometry	Measurement of the properties of light (especially luminous intensity.
pricing	The evaluation of something in terms of its price.
quantifiable	Able to be expressed or measured as a quantity. ***Quantifiable** data.*
quantify	Express or measure the quantity of. *Can you **quantify** your results.*
quantity	The figure or symbol representing a quantity. *Many people like to buy in **quantity**.*
size	Sized. *A wolf is about the **size** of a large dog.*
tachometer	An instrument which measures the working speed of an engine (especially in a road vehicle), typically in revolutions per minute.
tantamount	Being essentially equal to something. *His statement was **tantamount** to an admission of guilt.*

thick	Not thin of a specific thickness or of relatively great extent from one surface to the opposite usually in the smallest of the three solid dimensions. ***Thick*** *crowds.*
