The synonyms of “Metal” are: alloy, metallic element, rail, line, cover, surface, floor, top, finish, concrete, concrete over, asphalt, flag, tile, tar, tarmac, metallic

Metal as a Noun

Definitions of "Metal" as a noun

According to the [Oxford Dictionary of English](#), “metal” as a noun can have the following definitions:

- *A solid material which is typically hard, shiny, malleable, fusible, and ductile, with good electrical and thermal conductivity (e.g. iron, gold, silver, and aluminium, and alloys such as steel.*
- *Any of several chemical elements that are usually shiny solids that conduct heat or electricity and can be formed into sheets etc.*
- *A mixture containing two or more metallic elements or metallic and nonmetallic elements usually fused together or dissolving into each other when molten.*
- *The steel tracks of a railway.*

- *Broken stone for use in making roads.*
- *Gold and silver (as tinctures in blazoning).*
- *Heavy metal or similar rock music.*
- *Molten glass before it is blown or cast.*

Synonyms of "Metal" as a noun (4 Words)

alloy

An inferior metal mixed with a precious one.
*An **alloy** of nickel bronze and zinc.*

line

Denoting an image consisting of lines and solid areas with no gradation of tone.

*You must wait in a long **line** at the checkout counter.*

metallic element A fabric made of a yarn that is partly or entirely of metal.

rail

Railways as a means of transport.
*A curtain **rail**.*

Usage Examples of "Metal" as a noun

- *An adjustable pole made of metal.*
- *Industrial music is a blend of metal and techno.*
- *Being a metal, aluminium readily conducts heat.*
- *Crunching power-trio metal.*
- *The locomotive is presently being made ready for operation over Network SouthEast metals.*

*They ll be wanting to **tarmac** the path.*
- tile** Cover with tiles.
*The lobby was **tiled** in blue.*
- top** Provide with a top or topping.
*He was baffled as to how he could **top** his past work.*

Usage Examples of "Metal" as a verb

- *Several miles of the old road had been **metalled** with crushed stone.*

Metal as an Adjective

Definitions of "Metal" as an adjective

According to the [Oxford Dictionary of English](#), "metal" as an adjective can have the following definitions:

- *Containing or made of or resembling or characteristic of a metal.*
- *Containing or made of or resembling or characteristic of a metal- Ambrose Bierce.*

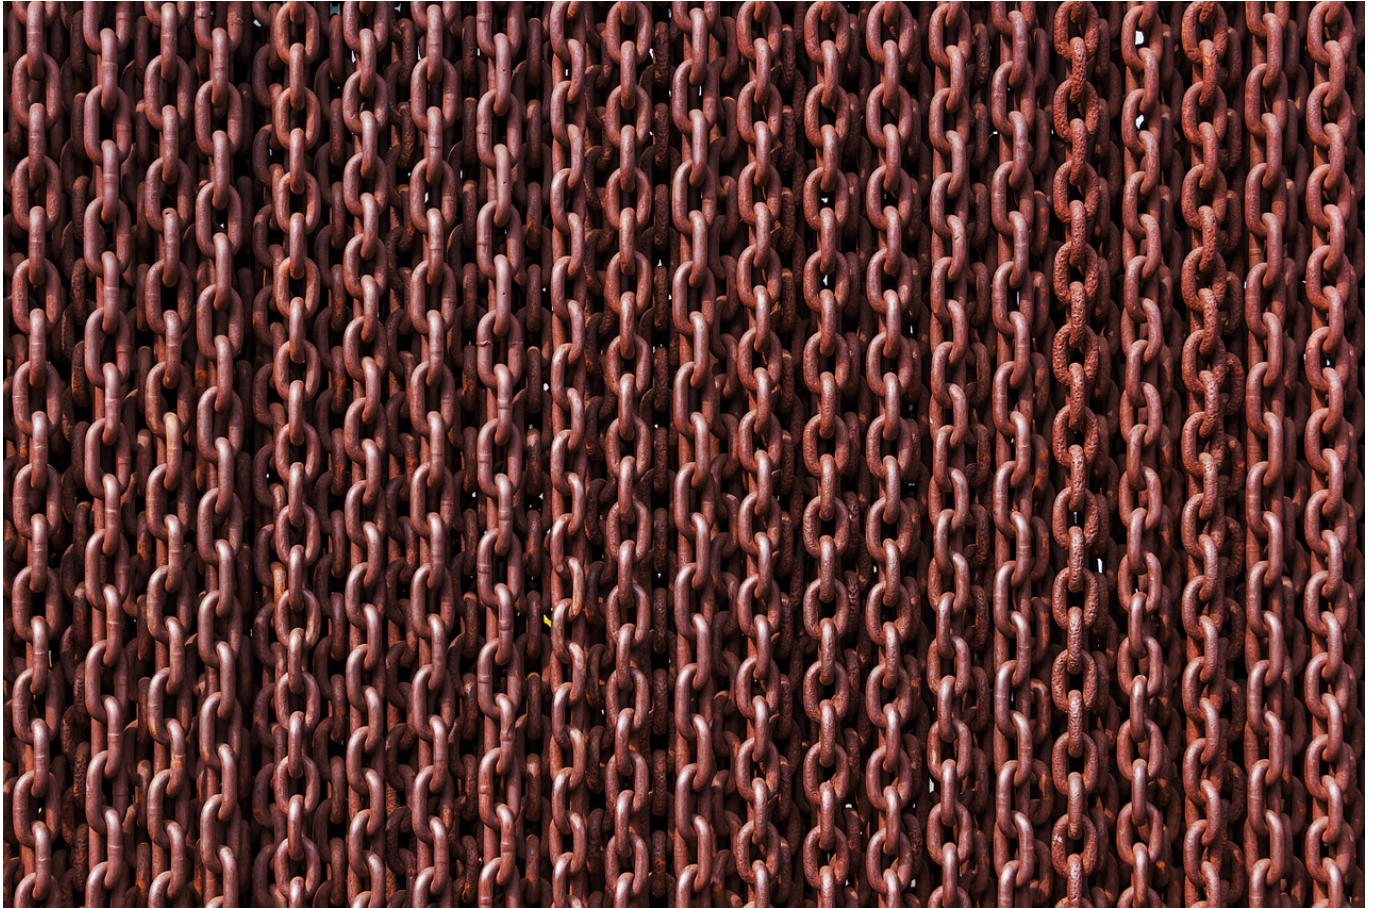

Synonyms of "Metal" as an adjective (1 Word)

Containing or made of or resembling or characteristic of a metal- Ambrose Bierce.

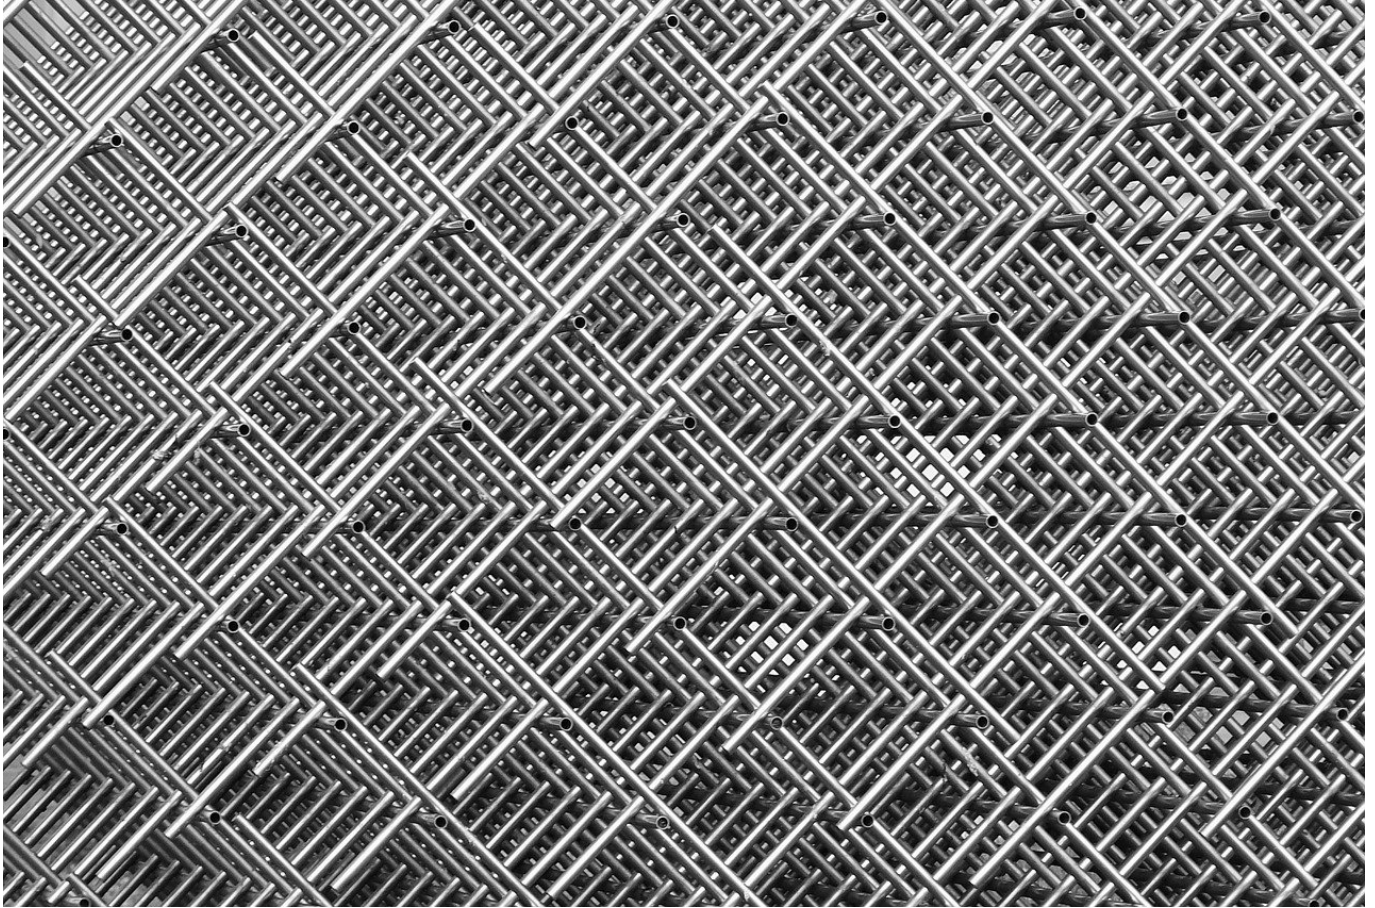

metallic

*The strange **metallic** note of the meadow lark suggesting the clash of vibrant blades.*

Usage Examples of "Metal" as an adjective

- *Metallic luster.*
- *The strange metallic note of the meadow lark, suggesting the clash of vibrant blades.*
- *A metallic compound.*

Associations of "Metal" (30 Words)

- acid** Having the characteristics of an acid.
Acid fruit.
- alkaline** Relating to or containing an alkali; having a pH greater than 7.
*A slightly **alkaline** solution.*
- alloy** Make an alloy of.
*An **alloy** of nickel bronze and zinc.*
- brass** The section of a band or orchestra that plays brass instruments.
*They wanted to spend their newly acquired **brass**.*
- bronze** Give the color and appearance of bronze to something.
*A **bronze** statue.*
- calcium** The chemical element of atomic number 20, a soft grey metal.
- carbonate** Convert into a carbonate.

cathode	The negatively charged electrode by which electrons enter an electrical device.
chemistry	The science of matter; the branch of the natural sciences dealing with the composition of substances and their properties and reactions. <i>Their affair was triggered by intense sexual chemistry.</i>
chloride	Any salt of hydrochloric acid containing the chloride ion. <i>The presence of sulphates chlorides and nitrates.</i>
copper	Brown coins of low value made of copper or bronze. <i>She had copper coloured hair.</i>
corrode	(of metal or other materials) be destroyed or damaged slowly by chemical action. <i>The metal corroded.</i>
ferrous	Of or relating to or containing iron.
grate	Furnish with a grate. <i>The buzzing sound grated on her nerves.</i>
hydroxide	A compound of a metal with the hydroxide ion OH as in many alkalis or the group OH.
ion	An atom or molecule with a net electric charge due to the loss or gain of one or more electrons. <i>A sulphate ion.</i>
iron	A meteorite containing a high proportion of iron. <i>The iron grip of the president on every aspect of foreign policy.</i>
lithium	Lithium carbonate or another lithium salt used as a mood stabilizing drug.
manganese	The black dioxide of manganese as an industrial raw material or additive especially in glass making.
metallic	A paint fabric or colour with a metallic sheen. <i>Metallic alloys.</i>
nickel	Plate with nickel. <i>We will see gasoline prices go up about a nickel.</i>
nitrate	Treat with nitric acid so as to change an organic compound into a nitrate. <i>Nitrated polycyclic aromatic hydrocarbons.</i>
nitrogen	The chemical element of atomic number 7 a colourless odourless unreactive gas that forms about 78 per cent of the earth's atmosphere. Liquid nitrogen made by distilling liquid air boils at 77.4 kelvins 195.8 C and is used as a coolant.
oxide	A binary compound of oxygen with another element or group. <i>Nitrogen oxide.</i>

- polymer** A substance which has a molecular structure built up chiefly or completely from a large number of similar units bonded together, e.g. many synthetic organic materials used as plastics and resins.
- potassium** The chemical element of atomic number 19, a soft silvery-white reactive metal of the alkali metal group.
- silicate** Any of the many minerals consisting of silica combined with metal oxides, forming a major component of the rocks of the earth's crust.
- silver** Provide mirror glass with a backing of a silver coloured material in order to make it reflective.
*Her worries had **silvered** her hair.*
- sodium** A silvery soft waxy metallic element of the alkali metal group; occurs abundantly in natural compounds (especially in salt water); burns with a yellow flame and reacts violently in water; occurs in sea water and in the mineral halite (r).
- zinc** Coat or cover with zinc.
*The metal has to be **zinc**ed to prevent oxidation and decay.*
