A prefix is a letter or a group of letters that appears at the beginning of a word and changes the word’s original meaning. It is important to know what different prefixes mean as they can help you to understand the additional meanings of words or unknown English words you come across.

Nouns, like adjectives or verbs, can be formed using prefixes. For example, the prefix non- can mean ‘not’ or ‘opposite.’ Adding non- to the word ‘sense’ gives you the word ‘nonsense’, which means words that have no meaning.

- She lives in a **subdivision** outside of a large city.
- That is a bunch of **nonsense**. I can’t believe you think that.
- He has to talk to his **ex-wife** frequently because of the children.
- The level of **malnutrition** in the children of this town is astonishing.
- There was a lot of **unrest** among the people after the president was arrested.
- For children with parents from different countries, **biculuralism** and **bilingualism** are often parts of their lives.
Her learning disability has made it difficult for her to keep up with classmates.

Prefix meanings

Prefixes are added to the root (base word) and may have various meanings.

Prefixes over-, under-, up-, down-, and hyper- denote the degree, quality, quantity, or a trend:

- **activity** - hyperactivity
- **fall** - downfall

To quantify something

Prefixes like mono-, bi-, uni-, di-, and omni- indicate the quantity of something in a word:

- **sulfide** - disulfide
- **bus** - omnibus

To denote the degree of something

Prefixes mega-, mini-, macro, and micro- express the degree of something in a word:

- **skirt** - miniskirt
- **economics** - macroeconomics
Tips to learn noun prefixes

Here are a few things to remember when learning prefixes:

1. Different prefixes in English can have similar meanings, such as *un-*, *in-* and *non-* all of which mean ‘not’ or ‘opposite of.’ Also, the prefixes *mis-* and *ir-* mean ‘wrong,’ ‘wrongly,’ or ‘incorrectly.’
2. Notice that double letters are possible. For example, when you add the prefix *im-* to words that begin with the letter ‘m,’ you get two ‘m’s as in ‘immeasurability.’ The same is true for many other prefixes.
3. When adding a prefix to a word, the spelling of the base word never changes. For example, the prefix *un-* did not change the spelling of the word ‘happiness.’
4. Watch out for ‘lookalikes’ – words that look like they contain prefixes but, in fact, do not. For example, the *un-* in the word “uncle” is not a prefix, nor is the *re-* in ‘real.’
