Spider as a Noun

Definitions of "Spider" as a noun

According to the [Oxford Dictionary of English](#), “spider” as a noun can have the following definitions:

- *Predatory arachnid with eight legs, two poison fangs, two feelers, and usually two silk-spinning organs at the back end of the body; they spin silk to make cocoons for eggs or traps for prey.*
- *A skillet made of cast iron.*
- *A set of radiating elastic ties used to hold a load in place on a vehicle.*
- *An object resembling a spider, especially one having numerous or prominent legs or radiating spokes.*
- *A computer program that prowls the internet looking for publicly accessible resources that can be added to a database; the database can then be searched with a search engine.*
- *Used in names of arachnids similar or related to spiders, e.g. sea spider, sun spider.*
- *A long-legged rest for a billiard cue that can be placed over a ball without touching it.*
- *An eight-legged predatory arachnid with an unsegmented body consisting of a fused head and thorax and a rounded abdomen. Spiders have fangs that inject venom into their prey, and most kinds spin webs in which to capture insects.*

Synonyms of "Spider" as a noun (1 Word)

wanderer A person who travels aimlessly.
*He is a longtime seaman a rootless **wanderer**.*

Associations of "Spider" (30 Words)

ant	A small insect typically having a sting and living in a complex social colony with one or more breeding queens. It is wingless except for fertile adults, which form large mating swarms, and is proverbial for its industriousness.
